

KIMTECH PREP EPIC BLUE WIPES

Meltblown Polypropylene | 250 Wipes

Product code: 6-KC4155

WypAll® EPIC | Kimberly-Clark Professional

Product overview

KIMTECH PREP EPIC blue wipes are textured meltblown polypropylene sheets for wiping oil, grease, ink and workshop grime. Each portable Brag Box contains 250 wipes measuring 42 × 34.5 cm, dispensed one sheet at a time.

Product specifications

Product code	6-KC4155 (see code discrepancy note)
Brand	Kimtech Prep EPIC (Kimberly-Clark Professional)
Material	Meltblown polypropylene
Colour	Blue
Sheet dimensions	42 × 34.5 cm
Pack format	250 wipes per Brag Box
Carton quantities	4 boxes per carton; 1000 wipes per carton
Dispensing	Single-sheet dispensing; portable Brag Box

Key features

- | | |
|---|--|
| <ul style="list-style-type: none"> • Meltblown polypropylene for heavier wiping tasks. • Textured surface helps pick up oil, ink and grime. • Large sheets cover benches, panels and equipment. • Absorbs grease and oily residues. | <ul style="list-style-type: none"> • Portable Brag Box stores and dispenses the wipes. • Single-sheet dispensing limits handling of unused wipes. • Can cover work surfaces during messy tasks. |
|---|--|

Applications & Cleaning Tasks

The following tasks reflect the supplied product information. Confirm wipe, surface and cleaning-agent compatibility before use.

Oil, grease and workshop grime

Wiping up grease, oily residues and workshop grime during maintenance and equipment cleaning. The textured meltblown polypropylene surface helps collect oily soils that are difficult to remove with ordinary paper towels.

Printing inks and equipment wipe-downs

Removing ink residues and wiping suitable print-room equipment and work surfaces. The large blue sheets provide coverage for routine print-area clean-up; check compatibility with inks and any cleaning chemicals used.

Painting and surface preparation

Wiping surfaces during preparation and cleaning up paint-related residue where the wipe and coating system are compatible. The sheets can be used around preparation benches and painting work areas.

Benches, panels and machine surfaces

Cleaning benches, tools, machine panels and workstations during industrial maintenance, engineering and production. Each 42 × 34.5 cm sheet can be folded to wipe a larger area or a smaller component.

Temporary work-surface protection

Using a sheet as a temporary cover on suitable benches or work areas during messy tasks, helping collect residue and protect the underlying surface. This is a temporary wiping material, not a rated protective barrier.

Solvent-assisted cleaning and controlled dispensing

Using compatible solvents for surface preparation or residue removal, after checking chemical and substrate suitability. The portable Brag Box dispenses one sheet at a time and helps keep unused wipes enclosed.

Industries & Work Environments

• Aged care • Automotive • Engineering	• Hospitality • Industrial maintenance • Painting	• Printing • Production workshops
--	---	--

Use and compatibility notes

Use dry or with a cleaning agent confirmed compatible with polypropylene and the surface being cleaned. Test sensitive materials first. Solvent suitability depends on the chemical and task. The supplied product description lists aged care and hospitality applications, but does not establish medical, food-contact or cleanroom certification. Product code differs within the source: SKU 5-KC4155; Selling Format 6-KC4155. Confirm the correct TIDDOX code before publication.
