

MIXED COTTON RAGS (COLOURED COTTON RAGS)

Recycled Cotton Cleaning Rags | 10 kg bags

Product code: 8-20029

TIDDOX

Product overview

TIDDOX Mixed Cotton Rags are economical, general-purpose wiping cloths made from recycled light cotton fabrics. Soft and relatively low-lint, they are used for everyday wiping of oil, grease, dirt and minor spills in workshops, machinery maintenance and general workplace cleaning. Fabric colours, sizes and absorbency vary between pieces.

Product specifications

Product code	8-20029
Brand	TIDDOX
Material	Recycled mixed light cotton fabrics; composition varies
Colour	Assorted colours
Sheet dimensions	Mixed cut pieces; dimensions vary
Pack format	10 kg bag
Pallet quantities	54 × 10 kg bags 36 × 15 kg bags
Packaging	Loose rags supplied in compressed bags
Metal detection	Metal-detection screened during processing

Key features

- Economical recycled cotton rags for everyday wiping.
- Soft fabric pieces for general-purpose cleaning.
- Suitable for wiping light oil, grease and grime.
- Relatively low-lint compared with some mixed rags.
- Assorted colours and fabric sizes vary by bag.
- Metal-detection screened during processing.
- Supplied loose in compressed 10 kg bags.
- Useful in workshops, maintenance and industrial cleaning.

Applications & Cleaning Tasks

Mixed Cotton Rags are used for routine commercial, industrial and professional wiping tasks. Applications depend on the fabric pieces supplied and the substances being cleaned.

Oil, grease and lubricant wiping

Wiping oil, light grease, lubricants and everyday residues from suitable machinery, tools, fittings and work surfaces during routine maintenance.

Automotive and mechanical servicing

Cleaning workshop benches, accessible engine components, vehicle servicing equipment and mechanical tools. Use only on surfaces suitable for mixed recycled fabrics.

Machinery and equipment cleaning

Wiping machinery housings, guards, production equipment and general maintenance components to remove grime and loose dirt.

Minor spills and workshop housekeeping

Absorbing and wiping up small spills of water, oil and compatible workshop fluids; cleaning workbenches and everyday workplace mess.

Engineering, fabrication and production

Removing routine machining oils, dirt and compatible residues from metalworking equipment, fabrication benches and production work areas.

Facilities, trades and fleet maintenance

General wiping of warehouse equipment, plant rooms, maintenance tools, fleet servicing areas and suitable trade work surfaces.

Industries & Work Environments

- Automotive workshops - Construction and trades - Engineering and fabrication	- Facilities management - Fleet maintenance - Manufacturing	- Mining maintenance - Warehousing - Workshops

Use and compatibility notes

Use with water or compatible cleaning products where appropriate. Mixed recycled fabrics can vary in composition, colourfastness, size and lint generation; test on sensitive surfaces. Metal-detection screening is a processing safeguard, not a guarantee that all foreign objects are absent. Handle and dispose of contaminated rags according to workplace safety requirements.
