

WYPALL X80 JUMBO ROLL BLUE WIPES

Perforated Hydroknit Wipes | 475 wipes per roll

Product code: 6-KC41043

WypAll® | Kimberly-Clark Professional

Product overview

WYPALL X80 Jumbo Roll (41043) contains blue Hydroknit cloth-like wipes for removing oil, grease, heavy soiling and liquid spills. The perforated sheets are intended for heavy-duty wiping of machinery, work benches and equipment, and for surface preparation with suitable cleaning agents. Wipes can be rinsed and reused where appropriate.

Applications & Cleaning Tasks

WYPALL X80 blue jumbo roll wipes are used for oil and grease cleanup, workshop maintenance, surface preparation and general heavy-duty wiping. The following tasks reflect the supplied product description.

Oil, grease and heavy-soiling removal

Absorb oil, grease and liquid spills from suitable work surfaces. The cloth-like Hydroknit construction is intended for wiping heavy soiling from benches, machinery and workshop equipment, including rough surfaces.

Perforated roll dispensing and hand wiping

Each roll contains 475 perforated wipes measuring 32 cm × 31.5 cm. Individual sheets can be torn from the roll for hand wiping, bench cleaning, equipment wipe-downs and spill response. The roll can be mounted on a wall or used with a mobile floor dispenser.

Machinery, workshop and maintenance cleaning

Wipe grease, dirt and grime from machinery, tools and maintenance equipment. The wipes can be wrung out and reused for further wiping where contamination controls and workplace procedures permit.

Food preparation and hospitality areas

Food Preparation Areas: Suitable for routine wiping of food preparation surfaces, subject to workplace hygiene procedures and product suitability requirements. The source identifies wiping sinks, grills, ovens and general work surfaces. Follow cleaning and sanitising procedures appropriate to each surface.

Glass, stainless steel and metal polishing

Used for wiping and polishing glass, stainless steel and other metal surfaces. Check surface suitability and cleaning method before use, particularly on finishes that may scratch.

Solvent-assisted surface preparation

The supplied description identifies use with suitable solvents to remove residues before painting, bonding and general maintenance work. Confirm chemical and surface compatibility before use.

Industries & Work Environments

• Food preparation • General cleaning	• Healthcare support areas • Hospitality	• Maintenance • Workshops
--	---	--

Use and compatibility notes

Use dry, with water or with a cleaning agent appropriate to the surface and task. Wring out and reuse only where workplace hygiene procedures permit. Dispose of contaminated wipes appropriately. No cleanroom, sterile or medical-device suitability claims are made.
