

WHITE COTTON RAGS

Recycled Cotton Cleaning Rags | 10 kg bag

Product code: 8-20025

TIDDOX

Product overview

TIDDOX White Cotton Rags are soft, absorbent, relatively low-lint wiping cloths cut from recycled white business shirts and other cotton clothing. Suitable for solvent wiping, paint preparation, printing equipment, polishing and general maintenance, they are supplied as loose cut rags in compressed 10 kg bags. Fabric sizes and composition vary.

Product specifications

Applications & Cleaning Tasks

Solvent wiping and surface preparation

Applying and removing compatible solvents and thinners; wiping surfaces before painting, coating, staining or finishing.

Painting, decorating and automotive refinishing

Removing paint drips and coating residues; wiping panels, spray equipment, tools and surfaces before refinishing.

Printing presses, inks and signage

Wiping printing presses, rollers, plates and tools; removing compatible ink residues from printing and signage equipment.

Polishing, furniture and timber finishing

Polishing suitable metal, chrome, glass and furniture; applying wood oils, stains and waxes and removing excess finish.

Mechanical, engineering and fabrication cleaning

Wiping tools, machinery, manufactured parts, metal components, hydraulic fittings, machining fluids and light grease.

Automotive, marine and aviation maintenance

Cleaning vehicle trim and mechanical parts, marine fittings and approved aviation or ground-support equipment surfaces.

Commercial, construction and workshop cleaning

Wiping benches, fittings, maintenance equipment and work areas; absorbing minor compatible spills and removing dust or grime.

Industries & Work Environments

• Automotive & panel beating • Aviation maintenance • Commercial cleaning • Construction & trades	• Engineering & fabrication • Furniture & woodworking • Manufacturing • Marine maintenance	• Mining maintenance • Painting & coatings • Printing & signage • Workshops

Use and compatibility notes

Recycled rag sizes, weave, composition and lint generation vary. Use only with compatible chemicals and on suitable surfaces; test delicate finishes before use. Metal-detection screening reduces risk but does not guarantee that every foreign object is absent. Store and dispose of solvent- or oil-soaked rags according to workplace safety procedures.
