

WHITE SHEETING RAGS

RECYCLED CLEANING RAGS

White recycled sheeting | 10 kg bag

Product code: 8-50025

Product overview

TIDDOX White Sheetting Rags are recycled white linen and cotton-blend fabric pieces sourced from sheets, pillowcases, gowns and similar textiles. Soft, absorbent and relatively low-lint, they are suited to general wiping, glass and mirror cleaning, polishing, surface preparation and workshop maintenance. Supplied loose in compressed bags.

Product specifications

Product code	8-50025
Brand	TIDDOX
Material	Recycled white sheeting and linen; cotton and cotton-blend fabrics, composition varies
Colour	White / off-white
Sheet dimensions	Mixed cut pieces; dimensions vary
Pack format	10 kg bag; minimum order 5 bags
Pallet quantities	54 × 10 kg bags 36 × 15 kg bags
Packaging	Loose rags supplied in compressed bags
Metal detection	Metal-detection screened during processing

Applications & Cleaning Tasks

Glass, mirror and window cleaning

Wiping glass panels, mirrors, windows, glazing and reflective surfaces where reduced visible fibre residue is desirable.

Stainless steel and metal polishing

Cleaning stainless steel benches, fittings and panels; removing polish residue and buffing suitable metal components.

Surface preparation and solvent wiping

Wiping surfaces before painting, coating, bonding or sealing; applying or removing compatible degreasers and cleaning solutions.

Printing press and signage cleaning

Cleaning printing press components, rollers, suitable printing plates, signage panels and tools; removing compatible ink residues.

Hydraulic and mechanical maintenance

Wiping accessible hydraulic hoses, fittings, cylinders, valves, bearings, housings and mechanical components where cloth wiping is permitted.

Conveyor, rubber and plastics cleaning

Wiping accessible conveyor belts, rollers and guides, rubber surfaces, moulded plastic parts and production equipment.

Automotive detailing and refinishing

Wiping vehicle glass, interior trim, chrome, door jambs and suitable panels before refinishing, subject to paint-system requirements.

Woodworking and furniture finishing

Removing dust from timber and cabinetry, applying compatible finishing products and buffing suitable furniture surfaces.

Workshop and manufacturing cleaning

Wiping workbenches, hand tools, finished parts, machinery and equipment during routine production and maintenance.

Small spill clean-up

Absorbing minor water, oil and compatible cleaning-fluid spills on suitable surfaces.

Industries & Work Environments

• Automotive and refinishing • Aviation maintenance • Commercial cleaning • Engineering	• Furniture and joinery • Glass and glazing • Manufacturing • Marine maintenance	• Metalworking • Printing and signage • Property maintenance • Workshops
--	---	---

Use and compatibility notes

Use dry or with cleaning agents. Recycled sheeting varies in fibre composition, thickness and lint generation. Metal detection reduces risk but does not guarantee removal of every foreign object or scratch-free wiping.
